

Train the Trainer Workshop

When: January 23 – January 25, 2019
Time: 0800-1700
Where: Johnson County Community College
Healthcare Simulation Center

JOHNSON COUNTY
COMMUNITY COLLEGE

Target Audience: Healthcare professionals and educators who are involved in simulation-based healthcare education.

RSVP Now to kcarver@jccc.edu
Workshop size is limited.

An important factor in Simulation-Based Medical Education (SBME) is the quality and preparedness of the instructors. Often, the instructors are experts in the relevant medical field, but have limited experience in SBME. In this workshop, participants will experience different aspects of the debriefing process and will be exposed to a structured training approach that leads to improved trainers' readiness and enhanced debriefing skills.

Workshop Content

- Simulation-based training and its unique characteristics
- Practice of core instructor roles: observe, process, debrief and facilitate
- MSR's video-based debriefing model
- Live and video-based scenarios for implementing debriefing skills
- Establishes a basis for best common practice and standardization of debriefing methodologies. Scenarios are tailored to trainees' background and experience.
